RAHAMATE ALAM ANSARI

IT SUPPORT | SYSTEM ADMINISTRATION | NETWORKING

Ombahal-22, Kathmandu, Nepal | +977-9800727437
ansarirahamatealam@gmail | My LinkedIn

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience in IT infrastructure support, system administration, network troubleshooting, endpoint security, and IT asset management through a System Engineer internship. Knowledge of Active Directory, switch configuration, VLANs, DHCP, Windows troubleshooting, Bitdefender GravityZone, and IT documentation. Experienced in supporting IT operations, assisting with user access administration, maintaining asset records, and coordinating technical issue resolution. Seeking an IT Support or IT Assistant position to contribute to reliable and secure business operations.

TECHNICAL SKILLS

IT Support: Hardware and software troubleshooting, Windows OS, software installation, peripheral support
Networking: LAN, TCP/IP, VLANs, DHCP, switch configuration, IP addressing, connectivity troubleshooting
System Administration: Active Directory, domain migration, user access checks, system audits, account support
IT Security: Bitdefender GravityZone, endpoint protection, antivirus monitoring, security compliance awareness
IT Operations: Asset inventory, onboarding/offboarding, technical documentation, service desk updates
Tools: Microsoft Excel, Outlook, Teams, Cisco networking equipment, Proxmox, Synology NAS (basic exposure)

PROFESSIONAL EXPERIENCE

System Engineer Intern *Completed May 2026*
Value Health Inc. / Connected Value Health Services

- Assisted with daily IT operations, system troubleshooting, endpoint security, and network infrastructure support.
- Supported network administration activities involving switch configuration, VLAN changes, DHCP MAC binding, and connectivity troubleshooting.
- Assisted with Active Directory audits, domain migration activities, user access checks, and system administration tasks.
- Supported Bitdefender endpoint protection deployment, GravityZone dashboard monitoring, and antivirus-related checks.
- Conducted IT asset audits, updated asset registers, and maintained technical records and documentation.
- Supported onboarding/offboarding checklists, service desk updates, and IT equipment record management.
- Coordinated with IT team members to assist in resolving technical issues and maintaining daily operational continuity.

ADDITIONAL TRAINING

Cisco Networking Virtual Internship *May 2024 – July 2024*

- Developed foundational knowledge of networking concepts, network infrastructure, and troubleshooting methodologies.
- Strengthened understanding of IP addressing, network communication, and network configuration principles.

PROJECTS

Small Office IT Infrastructure and Network Monitoring Lab *Planned / In Progress*

- Plan to build a small-office network lab to practise IP addressing, DHCP, switch connectivity, and LAN troubleshooting using a simulated or physical environment.
- Plan to document Windows system configuration, connectivity tests, device inventory, and common IT troubleshooting procedures.
- Intended to practise basic endpoint security checks, backup procedures, and network troubleshooting documentation.

Static Routing Network Configuration

- Designed a network topology to practise IP addressing, subnetting, routing configuration, and communication between network segments.

Vision-Based Smart Car Parking System

- Developed a computer-vision-based parking monitoring concept using OpenCV, region-of-interest extraction, and a web-based monitoring dashboard.

EDUCATION

Bachelor's Degree in Computer Science and Engineering
KPR Institute of Engineering and Technology (KPRIET)
Graduation year and final CGPA: Add verified details

CORE STRENGTHS

Problem-solving • Technical troubleshooting • Team coordination • Documentation • Adaptability • Willingness to learn
